### Brain Teaser

Some numbers are happy and others are not!

To find out whether a number is happy square each of its digits, add the answers and repeat. If you end up with 1 the number is happy!

E.g. Consider 19

$$1^2 + 9^2 = 82$$

$$8^2 + 2^2 = 68$$

$$6^2 + 8^2 = 100$$

$1^2 + 0^2 + 0^2 = 1$  which means that 19 is a happy number.

**How many other happy numbers can you find?**

Please put all your happy numbers with your name and tutor group in the brain teaser box in Ma6 before Friday 3<sup>rd</sup> July.
